*Due to a Diving Accident

Dive Accidents Waiver

Although scuba diving accidents are not common occurrences, there are certain risks inherent with diving activities, such as decompression illness. Some dive accidents require treatment in a hyperbaric chamber which although very effective, can be costly. Other types of accidents such as ear injuries are more common and also incur unexpected expenses during your vacation if you don't have coverage for diving accidents.

Please check applicable box:

- I already have insurance to cover the expense of evacuation and treatment related to scuba diving or snorkeling.
- I would like to be covered for the expense of evacuation and treatment related to scuba diving and snorkeling through the DAN Short Term Insurance Program.**
